Vanguard Cloud Solutions - HR & Corporate Policies

Employment & Equal Opportunity Policy

Vanguard Cloud Solutions is a globally distributed, merit-based organization. We are committed to fostering an inclusive, equitable, and diverse engineering culture.

- Strict adherence to equal opportunity employment.
- Zero-tolerance policy for discrimination, harassment, or microaggressions.
- Bi-annual performance evaluations focused on engineering impact and collaboration.
- Mandatory annual professional development budget ($3,000 per employee) allocated for cloud certifications, conferences, and technical training.

Time Off & Leave Policy

VCS operates on a high-trust model, emphasizing output and system reliability over hours logged.

- Paid Time Off (PTO): 24 flexible working days per calendar year. Employees must take a minimum of 10 consecutive days off annually to disconnect completely.
- Sick & Mental Health Leave: 14 working days per year, no questions asked.
- Parental Leave: 16 weeks of fully paid leave for primary and secondary caregivers.
- Volunteer Time Off (VTO): 3 paid days per year for community service or open-source software contributions.
- Unused PTO may be rolled over up to a maximum of 10 days into the first quarter of the following year.

Remote Work & Communication Conduct

As a remote-first organization, our operations rely on robust asynchronous communication and strict security protocols.

- Async-First: Internal updates, architectural decisions, and project statuses must be documented in written format (Jira, Confluence) rather than relying solely on synchronous meetings.
- Security & Device Management: All company-issued hardware must utilize Mobile Device Management (MDM). Use of personal devices for accessing client production environments or source code is strictly prohibited.
- Confidentiality: Employees must maintain absolute confidentiality regarding client architectures, vulnerabilities, and proprietary data.

Code of Conduct & Disciplinary Action

All team members must act with integrity, honoring our commitment to client security and internal respect. Violations will be addressed immediately.

- Level 1 (Minor Infraction): Documented verbal warning and mandatory retraining.
- Level 2 (Serious Infraction): Formal written warning and temporary suspension of production access (e.g.,

accidental exposure of internal data).
- Level 3 (Critical Violation): Immediate termination of employment and potential legal action (e.g., intentional data exfiltration, working under the influence during an active on-call incident response).
