Vanguard Cloud Solutions - Products & Services Pricing

Product Portfolio Overview

Vanguard Cloud Solutions (VCS) provides enterprise-grade cloud infrastructure, DevOps automation, and security services. Our portfolio is designed to help organizations transition to the cloud, optimize existing architectures, and maintain high-availability production environments. Services can be engaged on a project basis or through long-term managed service agreements.

VCS Managed DevOps & SRE

Our Site Reliability Engineering (SRE) and DevOps services integrate directly with your engineering teams to automate deployments and manage production health.
- CI/CD pipeline design and optimization (GitHub Actions, GitLab CI, Jenkins)
- Infrastructure as Code (IaC) implementation using Terraform and Pulumi
- 24/7 on-call incident response and runbook automation
- Kubernetes cluster management and auto-scaling configurations
- Observability and alerting setup (Datadog, Prometheus, Grafana)

VCS Cloud Migration Services

End-to-end migration execution for moving legacy on-premises workloads or transitioning between major cloud providers (AWS, Google Cloud, Azure).
- Infrastructure assessment and cost-benefit analysis
- Lift-and-shift server migrations
- Application refactoring for cloud-native microservices
- Database migration and zero-downtime cutover planning
- Post-migration cost optimization and right-sizing

VCS Security & Compliance Auditing

Dedicated security assessments to ensure cloud perimeters are hardened against external threats and meet industry compliance standards.
- Zero-Trust architecture implementation
- SOC 2, HIPAA, and PCI-DSS compliance readiness assessments
- Automated vulnerability scanning and penetration testing
- Identity and Access Management (IAM) role least-privilege configuration

Pricing & Service Tiers

VCS offers flexible pricing models structured around the scale and complexity of the client's infrastructure.
- VCS Launchpad (Growth Tier): $4,500/month flat retainer for startups requiring baseline cloud management. Includes 40 hours of DevOps consulting and standard business hours support.
- VCS Enterprise Shield: Scales based on total cloud spend (starting at $12,000/month + 5% of monthly billing). Includes 24/7 active monitoring, a dedicated SRE pod, and priority incident routing.

- Custom Consulting Engagements: Billed at blended hourly rates ($225/hour - $350/hour) for specific migrations or security audits.

Billing, SLAs, and Access

All managed service tiers include a 99.99% uptime Service Level Agreement (SLA) for managed components. Invoices are issued on the 1st of each month with Net-30 payment terms. Cloud provider consumption costs (AWS/GCP/Azure) are billed directly to the client's corporate accounts unless explicitly managed through VCS reseller agreements.
